

K2 DPF GO!

DPF/ FAP FUEL ADDITIVE

An effective additive for diesel engines that protects the particulate filter. Applied every 2000 km it reduces the deposition of soot and carbon particulates, ensures proper exhaust gas flow, increases filter service life. Especially suited to vehicles used for city driving and those that drive short distances.

Directions: Before refueling, pour the contents of the can into the tank. One 250 ml package is sufficient for 50 – 70 L of diesel fuel.
